Award Winning Features

Your YouMail plan includes these features to help intelligently manage your calls.

- **Stop telemarketers and unwanted callers** – Ignore calls from numbers you don't know. YouMail will decide if they're a spammer on YouMail's blacklist and play a "Number Disconnected" greeting to the bad guys. This takes you off the list forever. You can also add numbers to your own personal blacklist from the apps, email, or web site.
- **The world's easiest Conference Calling** – You now have your own 24-7 conference room, attached to your cell phone number. Any time you want a conference, tell people to call your cell and press 8 at the greeting. You can just join from the apps, dial your cell phone from any phone, or call (347) 896-6996.

- **An Automated Virtual Assistant** – YouMail will greet your callers by name. This is the default greeting currently setup in your account. If you want your own greeting, [click here](#) or record a greeting in the app. YouMail can also automatically and instantly reply to them with a link to a customized web page – great for turning calls into texts or email, letting people learn more about you, and collecting caller contact info. Set that up [here](#) or in the app.

Plus it includes the world's best voicemail bar none. You now have room for 100 messages, stored forever, organized in folders, and accessible from your smartphone, tablet, computer, and your voicemails can also be emailed to you (but only if you configure this in your account settings). Oh, and you can also access your messages by dialing (347) 896-6000.
